DEMTRUK

Model : -

FOLDABLE TROLLEY

The DEMTRUK is a very attractive foldable trolley. It allows one person to move, alone and very easily, heavy and big volumes up to 220Kg. The table is gliding from the wheel base into a car. The base can be folded in order to take a tiny place in the car. The height of the table is adjustable in order to fit in almost any car. Three table sizes are available : 700X600mm, 850X600mm and 1000X600mm. Three different bases are also available : a light weight base (max. 155Kg load capacity), a heavy weight base (max. 220Kg) and a heavy weight base with air inflated tires for moving fragile loads (max. 220Kg). The DEMTRUK is the unique solution to move heavy loads without back pain. It can also be used as worktable or to demonstrate a machine.
